<i>Extra-regio*</i>	4 277		3 270		

\* **Extra-regio:** The extra-regio territory is made up of parts of the economic territory of a country which cannot be assigned to a single region. It consists of the national air-space, territorial waters and the continental shelf lying in international waters over which the country enjoys exclusive rights, territorial exclaves, deposits of oil, natural gas etc. worked by resident units.

Until 2011, the gross value added (GVA) produced in the extra-regio was allocated pro-rata to the inhabited regions of the country concerned. The order of magnitude of the extra-regio GVA depends in particular on the resource endowment in terms of natural gas and oil. For EU Member States the share of extra-regio GVA varies typically from almost zero to about 2.5% of total GVA at national level. In 2011, Member States and the European Commission agreed to give countries the possibility to calculate regional GDP also for the extra-regio. The resulting GDP is available only in absolute values, because the extra-regio territory by definition does not have a resident population.

Member States are entitled, but not obliged to calculate GDP for the extra-regio. In the table extra-regio GDP appears only for those Member States which decided to make use of this possibility.
